the wonderful workings of nature produce a truly outstanding plant possessing the good traits of its parents and further endowed with beauty and merit far beyond that of its predecessors. Such a plant is "CHEROKEE CHIEF"—a truly red—Red-Flowering Dogwood (*Cornus Florida Rubra*) with excellent growth and outstanding foliage characteristics.

• NEW • DIFFERENT • OUTSTANDING

▼ BLOOMS A BEAUTIFUL DEEP RED

A clean rich ruby red that holds up throughout blooming period

▼ NEW GROWTH A BRIGHT RED

In spring and early summer the new growth is a bright red, much deeper than ordinary, reflecting the deeper color of the blossoms. Fall coloring is bright scarlet shading to green.

▼ EXCELLENT GROWER

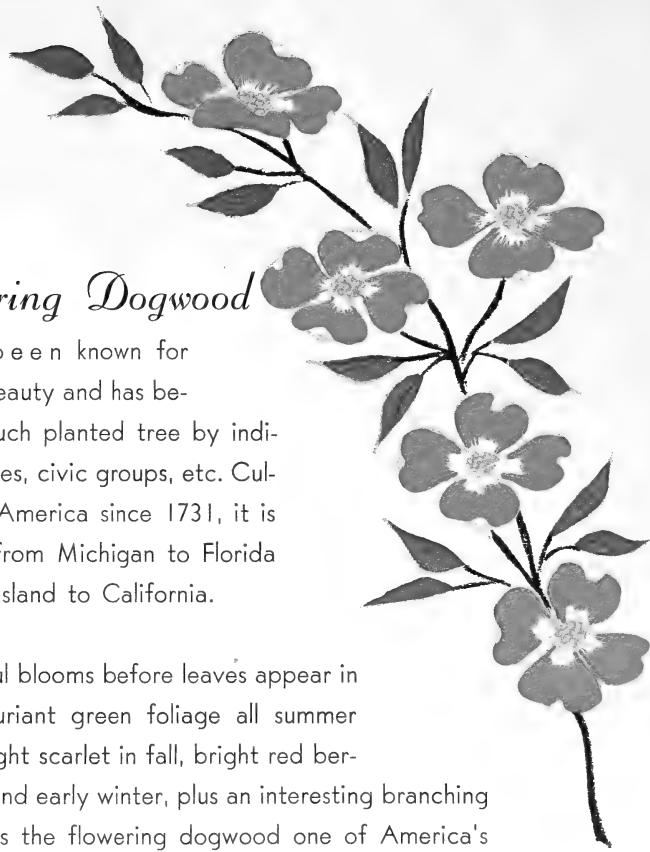

A strong clean grower with dominant leader and uniform branching habits.

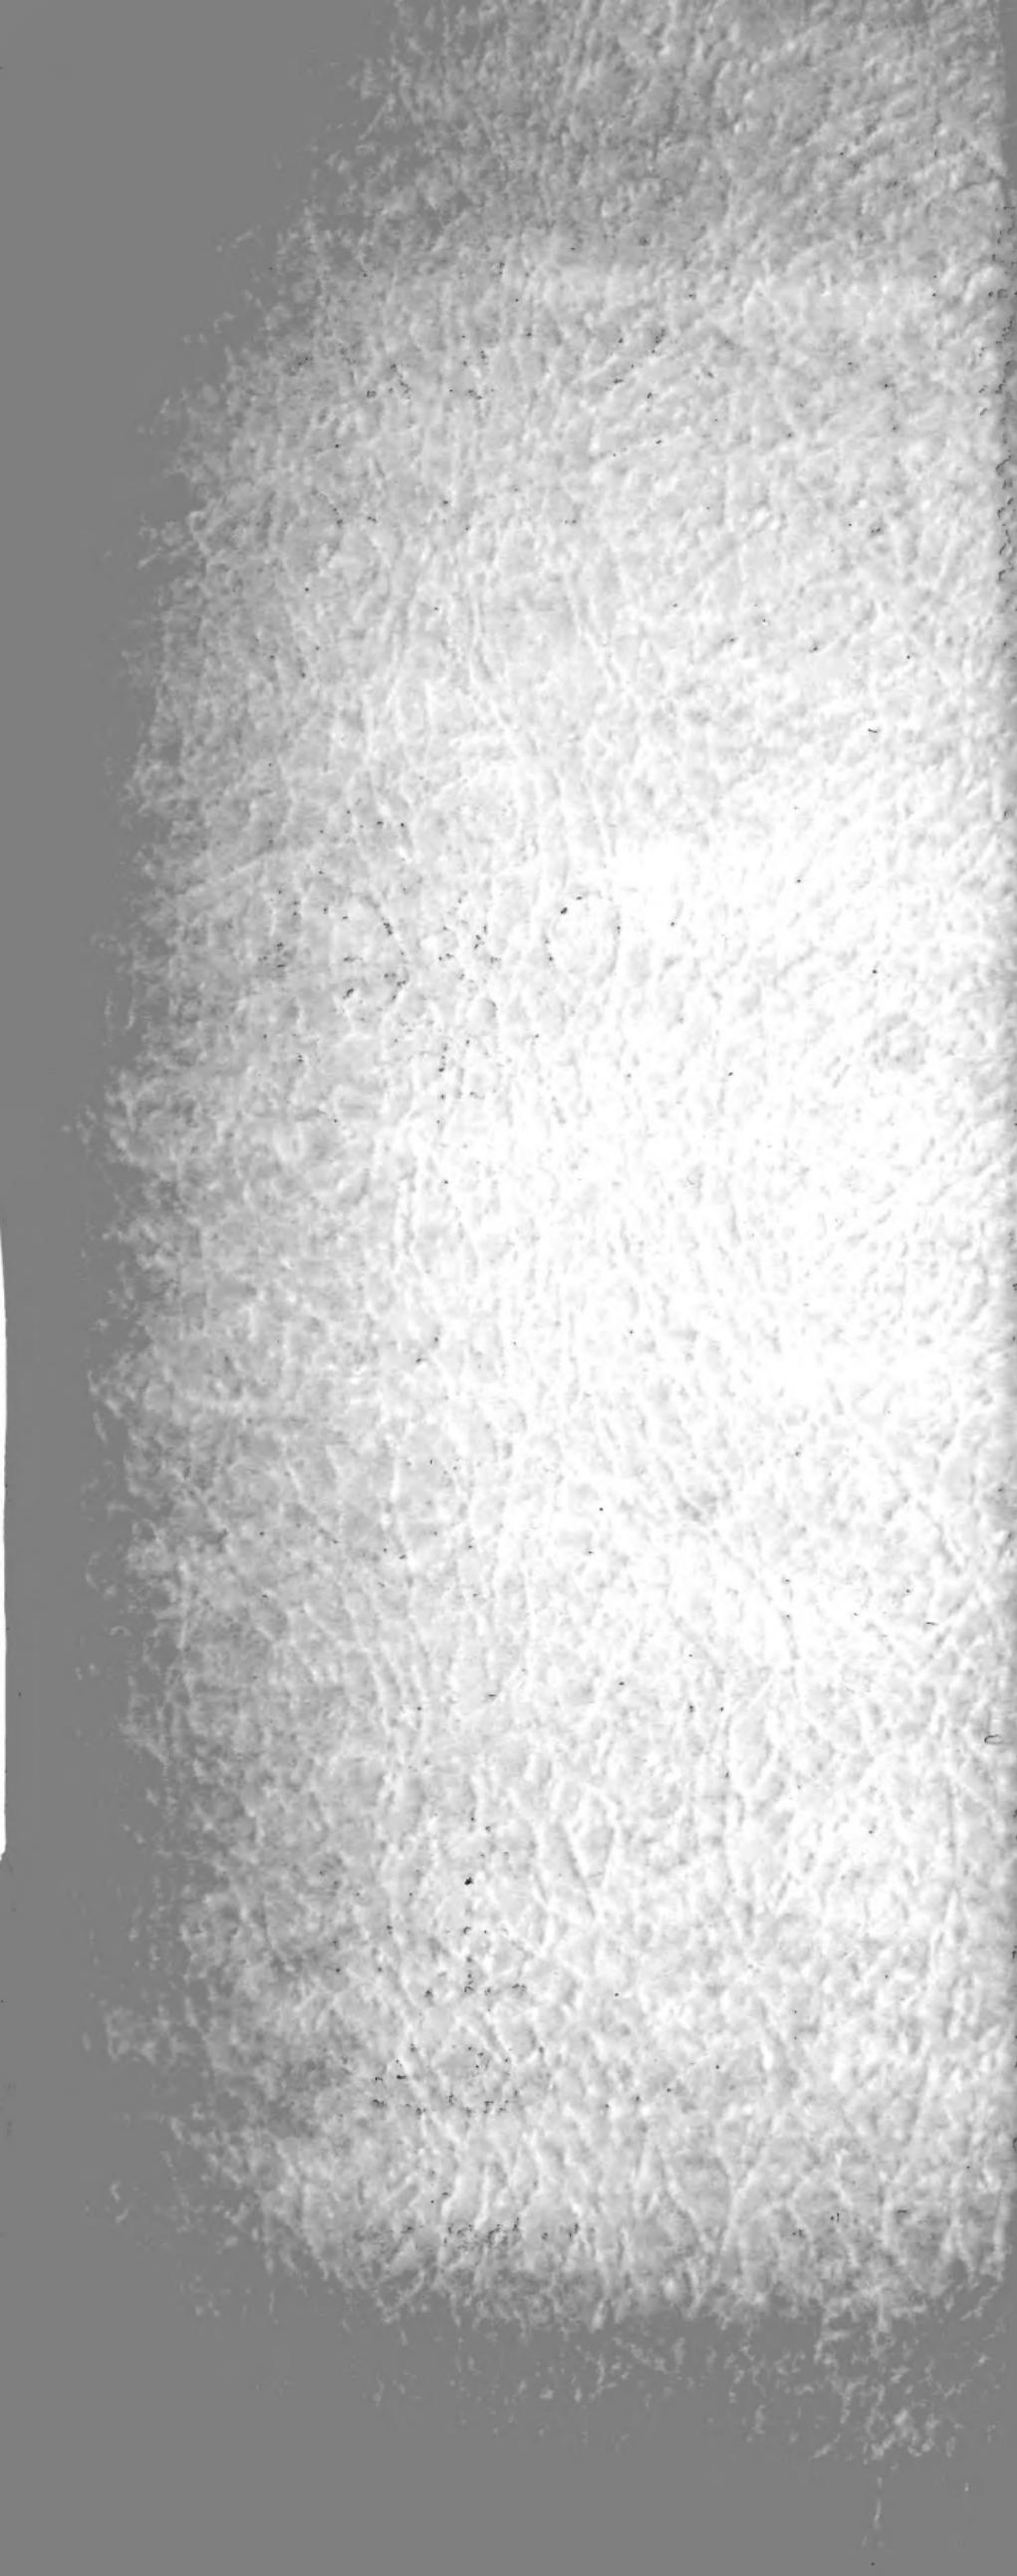

Flowering Dogwood

has long been known for its great beauty and has become a much planted tree by individuals, cities, civic groups, etc. Cultivated in America since 1731, it is now used from Michigan to Florida and Long Island to California.

Colorful blooms before leaves appear in spring, luxuriant green foliage all summer turning bright scarlet in fall, bright red berries in fall and early winter, plus an interesting branching habit makes the flowering dogwood one of America's most handsome trees with a special interest for every season of the year.

The new "CHEROKEE CHIEF" gives you all the above plus the deeper color of its blooms and foliage and its excellent growth characteristics. For the first time a truly outstanding—really red—Red-Flowering Dogwood.
